

Wingate Benefit Solutions

UK

Wingate Benefit Solutions specialise in helping international businesses design, implement and manage their UK employee benefit proposition.

We provide a highly personal service which acts as an extension to an organisations HR and People function on the management of their benefits.

We predominantly work with companies who have between 1 and 1,000 employees in the UK and understand these organisations and what their employees are seeking from their benefits. We can provide employers of up to 1,000 employees with bespoke data to enable benchmarking of benefit propositions and insights into current benefit trends.

Our heritage dates back over 40 years but our commitment to always do the right thing for our clients and their employees is as current as ever.
